

## Design An Imaginary Instrument

**Plan/Instructions:**

- Design an imaginary instrument by combining the characteristics of existing instruments or creating something entirely new!
- Keeping in mind the ways that existing instruments make sound, design your own imaginary musical instrument and draw it (you can colour it too). You can take an existing instrument and modify it, combine the characteristics of two or more instruments, or create something entirely new!
- Your instrument should be able to produce different pitches (high and low) and different dynamics (loud and soft).
- Do not design your instrument with the idea of physically building it - that will limit your ideas too much. Make it as grand and imaginative as you like!

**Materials Needed:**

Paper, pencil, coloured pencils or markers

**Source:**

Andrea Lewis, Fine Arts Coach, Anglophone South School District

**Opportunities for Stretch:**

Create an advertisement or commercial to promote and sell your instrument.
